

APPENDIX C

Socioeconomic Analysis

Setting and Impacts Summary

The Proposed Action would disassemble the Bevatron and demolish Building 51 and the foundation underneath the building. The site would be backfilled and the fill would be compacted and leveled. The Proposed Action would therefore not displace existing housing or residents. The Proposed Action would extend the existing roadway network adjacent to the project site. However, the new roadway segment would directly serve the project site, which would not include residential uses.

No new homes, employment, or infrastructure would be created as a result of the demolition of Building 51. As a result, no increases in population levels are anticipated. There are no existing housing structures associated with Building 51 and no homes would be demolished as a result of this Proposed Action. Therefore, no replacement housing is needed

Federal funding for the Proposed Action would be from national sources and would not represent an important commitment of local resources. Employment for the demolition would draw upon local populations and would not be perceptible in any particular employment or housing market.

The Proposed Action would therefore not directly or indirectly induce substantial growth in the area.
